

For many young people E2E is a major process of change and transition as they attempt to make progress in their lives. E2E Passport is an interactive website that aims to help them. It provides tools to support initial assessment, planning, review and transition.

Founding Concepts

The E2E Passport family of products share six common concepts on which the original ProgressMap was founded in 2000. These are:

- Focus**
the learner is at the heart of Passport: identifying needs, planning and tracking progress with them rather than for them
- Access**
using the web means that the Passport program and Passport data is always available to anyone who needs it
- Ownership**
because the learner is involved in creating and can access their Passport, they feel it belongs to them
- Interaction**
the simple forms are designed to facilitate interaction between the learner and professionals working with them
- Transition**
a learner's Passport moves with them allowing a range of professionals and organisations to contribute seamlessly

The Passport Family

Passport Online
 Passport Online is a website for supporting young people and their tutors and advisers on the Entry to Employment (E2E) programme. It offers tools to help them work together to set and achieve personal goals thus enabling them to see tangible evidence of the progress they are making.

Passport Offline
 Offline E2E Passport was designed to allow a Passport Adviser to download individual learner Passports from their caseload to a laptop computer. Once a Passport is on the laptop, the Adviser can continue working with a learner whilst not connected to the internet. When offline working is no longer required, the updated Passport is uploaded back to the main online system.

Passport Manager
 The E2E Passport Manager program is designed to provide elementary caseload management and statistics for colleagues managing E2E provision. Access to the program is via a login on an unlisted web page. Each E2E Provider, Connexions office or supporting organisation has a unique single login giving them access to their advisers and their caseloads. Although primarily about providing information and statistics, Manager also offers read-only access to a learner's complete Passport.
